Corrections and Additions to the work entitled "Geometrid Moths of the World", edited by M. J. Scoble (Lepidoptera) - III

Muhabbet Kemal Ahmet Ömer Koçak

Abstract: Corrections and Additions to the work entitled "Geometrid Moths of the World", edited by M. J. Scoble (Lepidoptera) - III. *Centr. ent. Stud., Misc. Pap.* 90: 1-5.

This paper deals with the corrections of the work entitled "Geometrid Moths of the World". Totally 102 errors have been corrected. Two junior synonyms have been determined: *Eupithecia ronkayi* Vojnits, 1994 (**syn.nov.**), *Phalaena bicolorata* Fabricius, 1798 (**syn.nov.**). An older synonymous name has been proposed as valid name for one species: *Macaria praeatomata* (Haworth, 1809) (**stat.rev.**). Eleven replacement names have been proposed: *Danielaparra* (**nom.nov.**), *Eupithecia descimoni* ssp. *ecuador* (**nom.nov.**), *Eupithecia hastaria* ssp. *tango* (**nom.nov.**), *Eupithecia uighurica* (**nom.nov.**), *Eupithecia nusret* (**nom.nov.**), *Eupithecia chilensis* (**nom.nov.**), *Idaea vivacolombia* (**nom.nov.**), *Perizoma hydrata* ssp. *masal* (**nom.nov.**), *Perizoma cesa* (**nom.nov.**), *Nyssiodes koreanus* (**nom.nov.**), *Scopula cesa* (**nom.nov.**).

Keywords: Taxonomy, nomenclature, geography, all states, *Lepidoptera*, *Geometridae*

In the year of 1999 a very important nomenclatural and taxonomical catalogue has been published by the Natural History Museum London: "Geometrid Moths of the World". Approximately 35 000 species group names listed in this catalogue with their original references. We compared the taxonomical information given in this catalogue with the basic information of our Centre. As a result of this, numerous geographical, taxonomical and nomenclatural errors has been recorded. In the previous issues, the necessary corrections have been made partly (vide Nr. 71 (2001) and Nr. 86 (2002) of this serial). In the present part of this survey, totally 103 serious errors have been corrected. They have been briefly explained in the following table and grouped as follows;

- A - nomenclatural case
- B - nomenclatural error, imperfectness or misspelling
- C - geographical error or imperfectness
- D - geographical error or imperfectness and misspelling
- E - taxonomical error
- F - taxonomical and geographical error
- G - Incorrect punctuation or typing

Each case has been indicated below, in the remarks column of the table.

No	Page	Incorrect	Correct	Remarks
1.	217	For Daniela Parra, 1996... [this name is invalid as it is junior homonym of Daniela Koch, 1891 (Coelenterata)]	read as Danielaparra (nom.nov.) pro Daniela Parra, 1996, Revta Lepid 24 (93): 42, nec Daniela Koch, 1891. Type species: <i>Daniela viridis</i> Parra, 1996 [Chile].	A

**Two nomenclatural cases
in the genera *Phtheochroa* Stephens and *Abrepagoge* Razowski
(Tortricidae, Lepidoptera)**

Muhabbet Kemal Ahmet Ömer Koçak

Abstract: Two nomenclatural cases in the genera *Phtheochroa* Stephens and *Abrepagoge* Razowski (Tortricidae, Lepidoptera). – *Cent. Ent. Stud., Misc. Pap.* 90: 5-6.

This paper deals with the nomenclatural status of two tortricid species in the western Palaearctic. Two replacement names are proposed: *Phtheochroa uighurica* (**nom. nov.**), *Abrepagoge cesa* (**nom. nov.**).

Keywords: Nomenclature, replacement names Tortricidae, Kazachstan, Mongolia, Romania, Bulgaria, Russia, Ukraine

Tortricidae

Cochylini

The taxonomical position of the following species has been discussed and a new combination under the genus *Phtheochroa* Stephens established by Razowski (1989). Unfortunately *undulata* Danilevski, 1962 cannot be used as valid name for the taxon according the Zoological Code (1999), as it is junior secondary homonym of *undulata* Lucas, 1946. Therefore, we propose here a replacement name in the species category for *undulata* Danilevski, 1962 in the following way:

***Phtheochroa uighurica* nomen novum pro *undulata* Danilevski, 1962 nec Lucas, 1946**

Distribution: Kazachstan: Dshungar Alatau, Mongolia (Razowski,1989) (cf. Razowski,1989).

Ramapesiini

The taxonomical position of the following species has been discussed and a new combination under the genus *Abrepagoge* Razowski,1992 established by Razowski (1992). Later the specific name *treitschkeana* Treitschke,1835 has been listed by Razowski (1993) as a valid name under the same genus name. Treitschke (1835) proposed this species under the generic name *Tortrix* Linnaeus. This name is junior primary homonym of the name *Tortrix treitschkeana* Fröhlich,1828; therefore it is considered as invalid according the Zoological Code (1999). Therefore, we propose here a replacement name in the species category for *treitschkeana* Treitschke,1835 in the following way:

Abrepagoge cesa nomen novum pro *Tortrix treitschkeana* Treitschke,1835 nec Fröhlich,1828

Distribution: Romania, Bulgaria, Russia Federation and Ukraine (cf. Razowski,1993: 673).

Nomenclatural Note on a Lasiocampid species in Surinam (Lepidoptera)

Muhabbet Kemal Ahmet Ö. Koçak

Abstract: Nomenclatural Note on a Lasiocampid species in Surinam (Lepidoptera). *Centr. ent. Stud., Misc. Pap.* 90: 6-7. This paper deals with the nomenclatural correction of a lasiocampid species from Surinam (South America). *Euglyphis phidonia* (Stoll,1782) is proposed as valid name. *Phalaena ornata* Stoll,1781 is invalid as being junior primary homonym of *Phalaena ornata* Scopoli,1763 (*syn.nov.*).

Key Words: *Euglyphis phidonia*, *Euglyphis ornata*, Lasiocampidae, Lepidoptera nomenclature, new synonym, Surinam

Checklist of the Neotropical Lepidoptera, covering the family Lasiocampidae has been published by Becker & Heppner (1996). During our preparation on the world wide data base program on the Lepidoptera, one species, *Euglyphis ornata* (Stoll,1781) has been found by us as junior primary homonym. According to the current Zoological Code, this name must be treated as invalid. This short nomenclatural note has been prepared for this purpose. Our proposal are given below:

***Euglyphis phidonia* (Stoll,1782) (sp. rev.)**

= *Phalaena ornata* Stoll,1781 nec *Scopoli,1763* (**syn.nov.**)
= *Phalaena phidonia* Stoll,1782

Phalaena ornata Stoll,1781 is invalid as being junior primary homonym of *Phalaena ornata* Scopoli,1763. The latter is currently used as valid name of a geometrid species in the genus *Scopula* Schrank,1802 of the Palaearctic fauna.

The name *Euglyphis phidonia* (Stoll,1782) must be used as valid name for the species under discussion.

Range of the species: Surinam.
